

# EURO-AMERICAN<sup>SM</sup> HOMECARE

KEEPING OUR SENIOR COMMUNITY SAFE DURING COVID-19

**In light of COVID-19 and social isolation, CDC is currently recommending that older adults when possible, should opt for In-home care. Euro-American Connections & Homecare is here to help you navigate these uncertain times and assist your loved ones with their needs.**

To ensure the safety of our clients, our Care Team is actively updating safety protocols and communicating them to our pre-screened and experienced caregivers, to ensure the safety of our clients. Our trained caregivers also help keep seniors physically and mentally engaged while staying safe at home during the pandemic. Here are some of the measures we have implemented to help ensure the safety of your loved ones.

## INFECTION CONTROL

Our caregivers are required to fill out an electronic daily health check-in that includes checking their temperature and possible Coronavirus symptoms. We have also been providing our caregivers with educational materials on how to properly use PPE materials as well as how to properly sanitize including surfaces and other materials.

## DROPLET CONTROL

To ensure that our caregivers and clients have all the necessary gear to protect themselves we have provided our caregivers with disposable gloves, shoe covers, face masks and face shields.

## ISOLATION CONTROL

Based on the daily health check in, if any caregiver shows any symptoms or has possibly been exposed, at that point, the caregiver, is required to self-isolate for 14 days, and is required to provide us with a COVID-19 test results before going back to an assignment.
